EBITDA - Capex	= IQ_EBITDA_CAPEX

Basic CIQ Formula: (Ticker, Data Point, Period)

for example: ("MSFT","IQ_TOTAL_REV", IQ_FY) would display Microsoft Corporation's most recent fiscal year revenue

Advanced CIQ Formula:

(Ticker, Data Point, **Period**, As of Date, **Reporting Type**, **Period/Filing Mode**, **Currency**, **Conversion Mode**)

IQ_FY	"L" = Latest	"P" = Period Date	"C" = Current
IQ_FQ	"LFR" = Reported	"F" = Filing Mode	"H" = Historical
IQ_LTM	"O" = Original		
IQ_YTD	"P" = Preliminary		
IQ_CY	"LRI" = Latest Reported Instance		
IQ_CQ	"LRP" = Latest Reported Period		
IQ_NTM			
IQ_FH			
IQ_CH			

Period Reference*

IQ_FY = 1,000
IQ_FQ = 500
IQ_LTM = 2,000
IQ_YTD = 3,000
IQ_CY = 10,000
IQ_CQ = 5,000
IQ_NTM = 6,000
IQ_FH = 100,000
IQ_CH = 110,000

* Subtract reference number by one for previous periods.
i.e. IQ_FY-1 = 999,
IQ_FY-2 = 998, etc.

for example: ("MSFT","IQ_TOTAL_REV", IQ_FY, "8/14/04", "LFR", "P", "EUR", "C")

or with ticker cell reference: (A1,"IQ_TOTAL_REV", IQ_FY, "8/14/04", "LFR", "P", "EUR", "C")

or with period reference*: (A1,"IQ_TOTAL_REV", A2,"8/14/04", "LFR", "P", "EUR", "C")

*cell A2 contains the number 1000, 500, 2000, etc.

CIQ Range Function:

Holder Name Example:

= CIQRANGE(Ticker,"IQ_HOLDER_NAME",1,**"X"**,,,,,"Header")

"X" equals to number of data points you want to extract
Example:
If X=5, CIQ will show upto 5 holders names of Noble Group Ltd.
,,,,, is the place holder for the header
"Header" is the column name
